Reviewer’s report

Title: Problems with sex among gay and bisexual men with diagnosed HIV in the United Kingdom

Version: 1 Date: 17 September 2012

Reviewer: Jeffrey Grierson

Reviewer’s report:

Overall this paper presents a cogent and engaging discussion of the profile and correlates of sexual problems experienced by gay and bisexual PLHIV in the UK. It presents findings on an important issue drawn from a high quality and methodologically sound survey conducted in 2007-2008.

Discretionary Revisions:
The interesting and internally consistent age differences noted in the results section are not further addressed in the discussion. It would be interesting to hear the authors’ views on how these differences might structure program or policy.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
