Reviewer’s report

Title: Cross-sectional Prevalence Survey of Intimate Partner Violence Perpetration and Victimization in Canadian Military Personnel

Version: 3 Date: 21 August 2013

Reviewer: Kate Walsh

Reviewer’s report:

1. My previous comment #7 included "How were the 10 acts of violence selected?" and the response was "Some additional detail and two references on this were added to the Methods section." I am not seeing any information about how these 10 acts were selected or how they correspond to the full CTS2 from which they were adapted. Please address.

2. My previous comment # 9 was getting at the fact this study used screening measures and referred to the responses as diagnoses. This is not acceptable. Please use the term "probable PTSD" or "probable depression" when describing the constructs as your study measured them.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
