Title: A community intervention for behaviour modification: an experience to control cardiovascular diseases in Yogyakarta, Indonesia

Version: 3 Date: 12 September 2013

Reviewer: Ying Li

Reviewer’s report:

Minor essential revisions:
1. The first NCD in the abstract need the full name
2. Table 3: on the column of P value, all of the commas should be dots.
3. Table 5: there should be a column to describe response to the programs in the four rows (something like “Response to PRORIVA program” as follows), otherwise this table is not clear.

Response to PRORIVA program Low SES community High SES community

Form of participation
Attitude to community activities
Perception of the meaningful of program
Approach to participating program

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
