Title: Neglected increases in rural road traffic mortality in China: findings based on health data from 2005 to 2010

Version: 1 Date: 23 May 2013

Reviewer: Gholamreza Masoumi

Reviewer's report:

Hi,

Thank you for good topic which is chosen by you to research, and also your wonderful recommendations at end. I think it is very important topic, and this importancy needs reliable and suitable data. Your data is reliable but it's not sufficient for whole country approach. So, I recommend you to limit the area to that 10% that you have data for statistician. Now your results would be OK and actually your recommendations could be for whole the country.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
