Reviewer’s report

Title: Predictors of participation in preventive health examinations

Version: 2 Date: 3 October 2013

Reviewer: Ciaran O’Neill

Reviewer’s report:

The authors have satisfactorily addressed the concerns I raised.

A number of typographical errors remain in the manuscript that should be addressed. In places too the English is a little clumsy and interrupts the flow of the paper. The authors may wish to enlist the assistance of a proof reader to address these matters.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
