Reviewer's report

Title: Antibiotic use and resistance in emerging economies: a situation analysis for Viet Nam

Version: 4 Date: 20 November 2013

Reviewer: Erika Vlieghe

Reviewer's report:

General: I think this new version has improved substantially, it is now very coherent and easier to read, and the narrative line of the discussion is very clear and news, interesting topics have been added. I would like to congratulate the authors for this.

Only minor, non essential comments:
pg 7: different reasons for irrational prescribing: suggest to space them with ',' and not with ';' as they all belong to the same sentence
pg 10: rifampicin use in agriculture: if possible please add reference
pg 12: Emerging Infectious Diseases: think it is not necessary to use capitals, as this is not an existing acronym (except for the journal, which you did not meant to refer to here I assume)

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
