Reviewer’s report

**Title:** Factors associated with HIV infection among children born to mothers on the Prevention of Mother to Child Transmission programme at Chitungwiza Hospital, Zimbabwe, 2008

**Version:** 3 **Date:** 15 September 2013

**Reviewer:** maricianah atieno onono

**Reviewer’s report:**

**Minor essential revisions**

The language is greatly improved but there still exists some typographical errors within the text.

**Discretionary revisions**

The authors have responded satisfactorily to the comments raised by other reviewers including myself. Certainly one strong recommendation that the authors should consider is for countries implementing single dose nevirapine to more effective combination PMTCT drugs in line with WHO recommendations.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
