Reviewer’s report

Title: Determinants of poor adherence to secondary antibiotic prophylaxis for rheumatic fever recurrence on Lifou, New Caledonia: a retrospective cohort study

Version: 2 Date: 26 November 2012

Reviewer: Philip Van der Wees

Reviewer’s report:

The authors have addressed my comments adequately. Based on the revised manuscript and previous comments of the other reviewer I have some minor essential revisions:

1. Include the provided information about the pilot-testing of the questionnaire in the paper.
2. Provide two decimal places for presenting the odds ratios.
2. The paper still has English language issues that should be addressed.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
