Reviewer's report

Title: Are Healthcare Workers' Intentions to Vaccinate Related to their Knowledge, Beliefs and Attitudes? A Systematic Review.

Version: 3 Date: 29 September 2012

Reviewer: Roger Thomas

Reviewer's report:

1. Major compulsory revisions.

The authors decline to update their review beyond 2009, arguing that the process of conducting the review took a long time. It is standard practice to update the search if a review takes a substantial time after the initial searches.

2. The authors also decline to expand their search terms to capture the full range of health care workers involved.

I do not think an outdated review is publishable.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
