Reviewer's report

Title: Determinants of vitamin A deficiency in children between 6 months and 2 years of age in Guinea-Bissau

Version: 3 Date: 31 December 2012

Reviewer: Andrew L Thorne-Lyman

Reviewer's report:

Thank you for your thorough responses to my questions and comments. I only have 2 further suggestions, both of which are discretionary:

1. I feel that it would be useful to provide national coverage of the VA supplementation campaign as background information.

2. As a clarification (p.10 on the comments), by “complete case approach” I meant that you excluded people from analysis who had <2% of a given variable missing.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
