Title: Reproducibility of Physical Activity Recall over Fifteen Years: Longitudinal Evidence from the CARDIA Study

Version: 3 Date: 8 January 2013

Reviewer: George Papathanasiou

Reviewer's report:

Mr Jimmar Dizon,

I have thoroughly studied both the revised manuscript of Smith et al and their responses to my review report. My opinion is that all major compulsory and minor essential revisions suggested were satisfactory answered by the authors. Therefore, my overall recommendation is that the authors' work should now be accepted for publication.

Kind regards,
