Reviewer's report

Title: Repository on maternal child health: Health portal to improve access to information on maternal child health in India

Version: 3 Date: 18 December 2012

Reviewer: Duncan Edwards

Reviewer's report:

Discretionary Revisions
I would have liked to have seen more reference to the theory of change articulated in terms of how the indicators of success/impact relate to this theory of change.

It would have been good to see qualitative data to delve more into understanding how users of the repository are gaining value and making use of the service.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
