Reviewer’s report

Title: Prevalence of factors associated with positive Venereal Disease Research Laboratory in parturient women in Northeast, Brazil

Version: 2 Date: 27 January 2013

Reviewer: Mohammed Bukar

Reviewer’s report:

The authors have made significant improvement on the manuscript. However, the grammatical errors are more and that must be corrected before publication.

When one carries out a cross sectional survey and also obtains complementary information through hospital records, admission form and prenatal records; what study type is it? This question has not been answered.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
