Title: Is Asthma a Vanishing Disease? A Study to Forecast the Burden of Asthma in 2022

Version: 1 Date: 10 August 2012

Reviewer: Nelson A Rosario

Reviewer's report:

Minor essential revisions:
Background: Recent evidence regarding temporal trends of asthma burden have not been consistent, with some countries reporting decreases in prevalent asthma.
I would suggest: "with some countries reporting decreases in prevalence of asthma".
References:
11 - correct the citation of journal title

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
