Reviewer's report

Title: Alcohol, betel-nut and cigarette consumption are negatively associated with health promoting behaviors in Taiwan: A cross-sectional study

Version: 3 Date: 11 February 2013

Reviewer: Jie-Min Lee

Reviewer's report:

General
The authors have introduced the changes suggested. Additional editing of the manuscript is still needed to adequate to the standard structure of a scientific report.

Minor essential revisions
On page12, the results part, to help get a handle on correlation of alcohol consumption associated factor with health promoting behaviors. I would have been interested to add logistic regression estimation to illustrate this or put this concern in the limitation.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
