Reviewer's report

Title: n3-fatty acid status as a marker of traditional food intake is associated with lower risk of iron depletion among food insecure Canadian Inuit women

Version: 1 Date: 18 September 2012

Reviewer: Lisa Tussing-Humphreys

Reviewer's report:

All revisions should be made or considered that are detailed in the attached response. Provide explanation when a revision is not made that was requested by this reviewer.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
