Reviewer’s report

Title: Substance use, risky sexual behaviors, and their associations in a Chinese sample of senior high school students

Version: 2 Date: 23 November 2012

Reviewer: Louisa Degenhardt

Reviewer’s report:

I have read through the revised manuscript and the response to reviewer comments.

Overall, I would have to say that more work needs to be done on the paper to make it of greater interest. I tend to agree with Reviewer 2 that there is marginal new knowledge arising from the paper, which would make me tend to suggest that a much more concise paper was warranted. Moreover, there seem to have been many data collected in their study, which probably would have been of interest to include. The quality of writing also still remains to be improved to make it of sufficient standard for a scientific journal.
