Reviewer's report

Title: Prevalence of intestinal parasitic infections and risk factors among schoolchildren in the University of Gondar community school, Northwest Ethiopia: a cross-sectional study

Version: 5 Date: 31 January 2013

Reviewer: Peter Steinmann

Reviewer's report:

During their second revision, the authors have again considerably improved the manuscript. They clearly made an attempt at improving the language (although, disappointingly, they did not introduce all suggested corrections and introduced new mistakes). They have also, mostly in minimalistic ways, introduced changes in response to reviewer comments.

The manuscript needs further careful editing for language and style. Otherwise, the scope for further improvements appears limited.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
