Reviewer's report

Title: Prevalence of intestinal parasitic infections and risk factors among schoolchildren in the University of Gondar community school, Northwest Ethiopia: a cross-sectional study

Version: 6 Date: 20 March 2013

Reviewer: Oystein Haarklau Johansen

Reviewer's report:

Thank you for your corrections and point-by-point response to previous reviews.

I have gone over table 4 and can now find no obvious mistakes in the numbers or significance calculations as in the previous versions of the manuscript. I also see that the previously unmentioned association between means of transport and parasitic infections has now been included in the discussion section.

There are only minor changes to the language since the last version, but none of the current mistakes impede understanding.

Major compulsory revisions
None.

Minor essential revisions
In their response to another reviewer, the authors note that they have carried out a multivariate analysis. This should be mentioned in the manuscript.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
