Reviewer’s report

Title: Assessment of maternal anemia in rural Western China between 2001 and 2005: a two-level logistic regression approach

Version: 1 Date: 20 September 2012

Reviewer: liqian Qiu

Reviewer’s report:

minor essential revision
1. In materials and methods: It should indicate how to classify the Western Province of China?
2. In the result session: It had better to compare the different degree anemia trend change over time since theoretically the prevention of anemia should be approved over time.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
