Reviewer’s report

Title: Health-related quality of life in migrant preschool children

Version: 2 Date: 3 April 2013

Reviewer: Jens Dreyhaupt

Reviewer’s report:

The authors have been very responsive to all comments. The ‘Discussion’ part has been reorganized and rewritten as suggested. Statistical methods and results for investigation of potential confounders are now much clearer. The addition of the last column of table 2 into table 3 will help the reader to understand the results in table 3.

The only thing I have concerns the second section on page 14 in the revised version of the manuscript: some older references are written in strikethrough text. This should be deleted (Minor Essential Revisions).

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
