Reviewer's report

Title: Reasons for poor adherence to antiretroviral therapy postnatally in HIV-1 infected women treated for their own health. Experiences from the Mitra Plus study in Tanzania.

Version: 3 Date: 22 April 2013

Reviewer: Sarah Dewing

Reviewer's report:

The paper has been revised and I think is much improved.

Minor essential revisions
1) spelling error -"mortility"

Discretionary revisions
1) I suggest moderating the following sentence: "...it was still an enormous challenge for most women to adhere adequately over a two-year period." (perhaps delete "enormous" and change "most" to "some"?)

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
