Reviewer's report

Title: An exploratory study of associations of physical activity with mental health and work engagement

Version: 2 Date: 21 May 2013

Reviewer: Simon Øverland

Reviewer's report:

The authors have made significant improvements to their manuscript. The analyses have become much more available and informative from the revisions made in the introduction and the clarified aims. The discussion is also greatly improved, and in my opinion it is much clearer what the study adds, including a recognition of its limitations. There are some spelling errors and typos in the manuscript, that the authors should be able to sort out and amend during proofreading.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
