Reviewer's report

Title: Exposure Assessment of Dietary Cadmium: Findings from Shanghainese over 40 years, China

Version: 2 Date: 26 March 2013

Reviewer: Augusto Alberto Pastorelli

Reviewer's report:

Minor Essential Revisions

Comment n.3) Interpretation of results is generally balanced and supported by the data.
Authors should indicate NML for each food categories.

Answers: Table 5 was added in the revised version.

Authors indicated NML for each food categories in Table 6 [Comparison of Cadmium Maximum Levels (MLs) in Foodstuffs (mg/kg)] of revised version.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
