Title: Developing and costing local strategies to improve maternal and child health: results from four countries

Version: 3 Date: 23 May 2013

Reviewer: Azmat Syed Khurram

Reviewer's report:

Discretionary Revisions:

I do not see much of costing in the paper as compare to the Title: Developing and costing local strategies to improve maternal and child health: results from four countries.

I would have appreciated to see some recommendations for costing calculations. Especially, how comfortably the researchers and policy makers of the similar settings can use the costing strategies!

Nevertheless, this paper and topic is of important value.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
