Reviewer’s report

Title: Development and feasibility testing of a smartphone based attentive eating intervention

Version: 1 Date: 29 April 2013

Reviewer: Gary Sacks

Reviewer’s report:

1. This paper reports on the development and feasibility testing of a smartphone app that aims to increase attentive eating. The study is a small one, but seems to be appropriate as a feasibility test. The paper is very clearly written, the study well described, the findings appropriately framed, and next steps clearly articulated.

Minor Essential Revisions

2. Line 80: "Tenet" instead of "tenant"?
3. Line 315: "Study’s" rather than "studies"?

Discretionary Revisions

4. Line 83/84: It would be helpful if there was a reference to justify this assumption.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
