Reviewer's report

Title: Relationship between Body Mass Index (BMI) and body fat percentage, estimated by bioelectrical impedance, in a group of Sri Lankan adults: a cross sectional study.

Version: 2 Date: 14 August 2013

Reviewer: Gustavo Duarte Pimentel

Reviewer's report:

The present study sought to investigate the relationship between the BMI with body fat percentage derived by BIA. However, this study has not new data and was studied only a population specific of Asiatic Continent. Moreover, neither socioeconomic data from individuals was reported. Therefore, the publication of data already known in the literature takes this work of low scientific relevance.

Level of interest: An article of limited interest
