Title: Seasonal variation in objectively measured physical activity, sedentary time, cardio-respiratory fitness and sleep duration among 8-11 year-old Danish children: a repeated-measures study

Version: 4 Date: 26 July 2013

Reviewer: LUIS GRACIA-MARCO

Reviewer's report:

The quality of the manuscript is improved after the corrections. Please, consider this comment to include as an additional minor limitation:
- Questionnaire data: time spent video games. There are other video consoles in which you do not need to move to play. Therefore, the authors might be missing some time spent in video games. The addition of a comment on this would be recommended in the limitations section.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
