Reviewer's report

Title: Men having sex with men serosorting with casual partners: who, how much, and what risk factors in Switzerland, 2007-2009

Version: 1 Date: 10 May 2013

Reviewer: Michael W Ross

Reviewer's report:

This is an important and well-written manuscript on a topic which has become of great significance recently given serosorting and HIV transmission. I have no changes to suggest since the MS was clear and easily read, and the statistics are appropriate for the data and the conclusions.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
