Reviewer’s report

Title: Can we trust measures of healthcare utilisation from household surveys?

Version: 5 Date: 15 August 2013

Reviewer: Manoj Mohanan

Reviewer’s report:

This manuscript by Ansah and Powell-Jackson poses an important and timely question about whether researchers can rely on commonly reported measures of healthcare utilization from household surveys. The authors have addressed concerns raised in the first round of referee reports adequately.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
