Title: Cardiovascular Disease Risk Factors and Socioeconomic Variables in a Nation Undergoing Epidemiologic Transition

Version: 2 Date: 4 July 2013

Reviewer's report:

Dear authors:

Thank you for allowing me to review your revised paper and for taking into account the comments highlighted.

My only comments would be in the 'Conclusion' section:

(1) On the point of your third limitation ("Thirdly, panel data, which refers to data collected from multiple but the same respondents over time, is superior when analysing causal factors") - this is not really a limitation of your study.

Thank you
