Reviewer's report

Title: Quality of Life Impairment Associated with Body Dissatisfaction in a General Population Sample of Women

Version: 4 Date: 9 September 2013

Reviewer: Petra Graham

Reviewer's report:

Many thanks to the authors for their work in revising this manuscript. I had been previously confused about the descriptions and analysis of the outcome and predictor variables and also with respect to which was the outcome and which was the predictor in the previous manuscript. The current manuscript has clarified all of this considerably and has answered all of my questions.

The article is interesting and contains potentially important findings.

I recommend this article for publication in BMC Public Health.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
