Reviewer’s report

**Title:** The association between family and community social capital and health risk behaviours in young people: an integrative review

**Version:** 1 **Date:** 10 June 2013

**Reviewer:** Michael J Mason

**Reviewer’s report:**

The paper was very clear in its central question, its implications, and its justifications. The paper was very well written and concise. The methodology was appropriate for the questions, described in sufficient detail, and used very sound data. The conclusions are clear, and are grounded in the data. Limitations are clearly noted. Overall, this was a very enjoyable paper to read and I believe will be valuable across many disciplines.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
