Reviewer’s report

Title: Pharmacy refill adherence outperforms self-reported methods in predicting HIV therapy outcome in resource-limited settings

Version: 1 Date: 23 May 2014

Reviewer: Maja Stanojevic

Reviewer’s report:

This study provides evidence about performance of different methods to assess adherence to antiretroviral therapy. The issue of adherence is of crucial importance for optimal virological therapy response. The study is well designed and presented in a clear and straightforward way. It contributes to better management of ARV treatment in resource-limited settings.
