Reviewer's report

Title: An update on general and abdominal obesity in rural Northeast China: from lifestyle risk factors to cardiometabolic comorbidities

Version: 2 Date: 12 August 2014

Reviewer: Konstantinos Tziomalos

Reviewer's report:

This is an interesting and well-written study on the prevalence of obesity in China, its determinants and its sequelae. The findings are important, the methods are clear and the Discussion is adequate.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
