Reviewer's report

Title: Vulnerability of Bangladeshi street-children to HIV/AIDS: a qualitative study

Version: 3 Date: 31 July 2014

Reviewer: Rubeena Zakar

Reviewer's report:

The authors assessed the vulnerability of Bangladeshi street children to HIV/AIDS and used qualitative participatory methods to create a more nuanced understanding of their vulnerability to STIs/HIV.

I found it a fascinating article. I learned a great deal about the problems of street children, they were/are facing in Bangladesh. I think this work should definitely be published; there are some minor problems which should be corrected before acceptance for publication:

Minor Revisions
1) What is icddr,b? It is the first line of ethical consideration.
2) Kindly explain little bit about DIC and its activities (First paragraph, result section)
3) Line 190 in result section may be corrected.
4) Line 251, kindly explain vangari dokandars

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
