Reviewer’s Report
Manuscript titled: Prevalence of diabetes and impaired fasting glucose among residents in Three Gorges Reservoir Region, China

1. Is the question posed by the authors well defined?: Yes

2. Are the methods appropriate and well described?: Yes

3. Are the data sound? Yes

4. Does the manuscript adhere to the relevant standards for reporting and data deposition? Possibly, Yes

5. Are the discussion and conclusions well balanced and adequately supported by the data? There is room for improvement. Critiques and in-depth interpretations of results are lacking, which lead to ‘superficial’ discussions and recommendations.

6. Are limitations of the work clearly stated? Yes but there is room for improvement

7. Do the authors clearly acknowledge any work upon which they are building, both published and unpublished? Yes

8. Do the title and abstract accurately convey what has been found? The title and abstract accurately convey the aim.

9. Is the writing acceptable? Yes

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
