Reviewer's report

Title: Prevalence and Risk Factors of Cervical Neoplasia: A Cervical Cancer Screening Program in Beijing

Version: 5 Date: 24 May 2014

Reviewer: Marcia Edilaine Lopes Consolaro

Reviewer's report:

Major compulsory revisions

Mat/Mets
-Subjects:
For human studies, there is a need to study approval by an ethics committee that regulates these studies.

Again, the authors did not include in the study committee which was approved, approval year and number. Only the consent form signed by women is not enough.

Without these data, the manuscript can not be published in any way.

Level of interest: An article of importance in its field

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

No
