Reviewer's report

Title: Khat chewing among Ethiopian university students - a growing concern

Version: 4 Date: 22 May 2014

Reviewer: Maged El-Setouhy

Reviewer's report:

Major Compulsory Revision
None of these is provided
The sample size formula
Nor a reference used according to which the sample size is calculated
Nor the software used to calculate the sample size

Otherwise the manuscript is getting much better. If they provided how they calculate the sample size and proved to be calculated right the manuscript can be published after English and Reference editing

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
