Reviewer's report

Title: Khat chewing among Ethiopian university students - a growing concern

Version: 4 Date: 20 May 2014

Reviewer: Mohamed Mahfouz

Reviewer's report:

Major Compulsory revisions:

1. In the methodology section sample size determination is still needs more clarifications, it is not enough to mentioned that it is a representative sample size, what are the assumption used for calculating the sample size?????.
2. An English correction by a native speaker is necessary.

Minor Essential Revisions

1. The methodology section needs further organization especially after adding the new information.
2. In table one it would be better to mention percentage instead of proportion.
3. For P. Value in table 3, it is best to use *P < 0.05; **P < 0.01; ***P < 0.001. instead of a b c

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
