Title: Predictors of onset of cannabis and other drug use in male young adults: Results from a longitudinal study

Version: 3 Date: 8 September 2014

Reviewer: Monique Delforterie

Reviewer's report:

I am satisfied with the changes that were made. There is one change in the abstract that I would like to see changed:

Minor Essential Revisions:
In the abstract, parental monitoring is still used, while this is changed into parental knowledge in the text, which is the best description for the measure that was used.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
