Reviewer's report

**Title:** Evaluation on Intervention Effects of Work-related Musculoskeletal Disorders among School Teachers

**Version:** 2  **Date:** 1 July 2014

**Reviewer:** Stefano Candura

**Reviewer's report:**

Major compulsory revisions

1. The study describes an articulated educational intervention on work-related musculoskeletal disorders among Chinese school teachers. The results indicate beneficial preventive effects.

   The paper appears interesting and worth publishing, however an accurate linguistic revision is needed.

2. The title of the article should be better formulated, e.g. "Effects of an educational program for the prevention of work-related musculoskeletal disorders among school teachers".

**Level of interest:** An article of importance in its field

**Quality of written English:** Not suitable for publication unless extensively edited

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
