Reviewer's report

Title: Assessing the Effects of an Educational Program for the Prevention of Work-related Musculoskeletal Disorders among School Teachers.

Version: 3  
Date: 7 October 2014

Reviewer: Johannes R Anema

Reviewer's report:

This study presents the results of an education and training intervention aimed at reducing musculoskeletal disorders (MSD) among school teachers in China. We agree with the authors that MSDs are a problem among the working population in developed as well as developing countries. Therefore, this article addresses a relevant and important topic in occupational and public health. The authors have addressed all review points sufficiently well. No further revisions are necessary.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
