Reviewer's report

Title: Nutritional and behavioral determinants of adolescent obesity: a case-control study in Sri Lanka

Version: 3 Date: 21 August 2014

Reviewer: Ruveyde Bundak

Reviewer's report:

The authors analyzed the risk factors associated with obesity among adolescent in Sri Lankan school girls very well. There is one thing that I cannot understand. The data was cross-sectional in nature and there is no follow up. But they said that they use paired -T test. One can use this test in follow up data in the same group.

I think this paper will be useful for the developing countries for planning their community health.

Level of interest: An article of limited interest
