Reviewer’s report

Title: Specific Genotypes of Human Papillomavirus in 125 High-grade Squamous lesions and Invasive cervical cancer cases from Congolese Women

Version: 2 Date: 6 October 2014

Reviewer: Hugo Sousa

Reviewer’s report:

Dear editor, in this manuscript the authors have described the prevalence of different HPV genotypes in Congolese women with high grade cervical lesions or invasive carcinomas. The approach to the sample selection and methods seems reasonable for this type of study and the data analysis and interpretation seems correct.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
