Reviewer's report

Title: Vitamin D Status among Patients Visiting a Tertiary Care Center in Riyadh, Saudi Arabia: A retrospective review of 3475 cases

Version: 2 Date: 29 December 2013

Reviewer: Nasser Al-Daghri

Reviewer's report:

Alfawaz and colleagues collected an impressive number of patients to solidify the high prevalence of vitamin D deficiency in the urban capital of Riyadh, Saudi Arabia. The findings are succinct and clearly answers the objectives. The subject is well within the scope of BMC Public Health. I have no further comments. This paper can be published as is with minor language check prior to acceptance.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
