Reviewer's report

**Title:** Vitamin D Status among Patients Visiting a Tertiary Care Center in Riyadh, Saudi Arabia: A retrospective review of 3475 cases

**Version:** 2  
**Date:** 5 January 2014

**Reviewer:** Shaun Sabico

**Reviewer's report:**

Well written article.

Minor essential revisions

I find it surprising that the mean BMI for the entire cohort is very high (morbidly obese). Is it possible to include in the first table the prevalence of obesity in the group? Can the authors address this in the discussion, since BMI is known to influence vitamin D status.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.

**Declaration of competing interests:**
