Reviewer’s report

Title: Assessment of occupational injuries among Addis Ababa city municipal solid waste collectors: A cross-sectional study

Version: 2 Date: 7 November 2013

Reviewer: Sk. Akhtar Ahmad

Reviewer’s report:

Comments
1. 1. The question posed by authors seems to be well defined.
2. Methods seem to be appropriate and are elaborately described.
3. The authors require to state limitations of the work.
4. Discussion seems to be adequately supported by data. Conclusions- ‘Implementation of basic occupational health and safety services including training on occupational health and safety’ not supported by data
5. In the Result section ‘Table=1’ is missing. The reference section requires a lot of attention. (For example see ref nos 3, 4, 5, 6, 7……………).
6. Going through the manuscript it appears to me that it has been hastily submitted.
7. It is advisable that the authors should have a look at articles that have already been published in your journal and redo the manuscript.
8. The findings of the article are important to those with closely related research interests.
9. Language is a serious impediment to understanding and requires extensive editing before review is redone.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
