Reviewer’s report

Title: Sleep duration and incidence of lung cancer in ageing men

Version: 2 Date: 1 February 2014

Reviewer: mariangela rondanelli

Reviewer’s report:

Dear Editor,
thank you for giving me the possibility to review the present manuscript entitled “Sleep duration and incidence of lung cancer in ageing men”. The authors have addressed an important issues and the study is very interesting. However, I think that is necessary minor revisions prior to publication.
These are my remarks.

Materials and methods
Was investigated whether subjects took melatonin? if so, this data must be entered, if no authors have to write that has not been evaluated.

Discussion
In the discussion you have to enter some sentences in which it is considered the published literature on the relationship between weight and cancer of the lung. Authors must also comment on this report in their study.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
