Reviewer’s report

Title: Health promotion interventions for increasing stroke awareness in ethnic minorities: a systematic review of the literature

Version: 2 Date: 3 April 2014

Reviewer: Nathan Stephens

Reviewer’s report:

The authors have addressed the recommended changes and provided rationale for some of the areas which were ambiguous. Overall, there do not remain any major issues with this version of the paper.

Minor Essential Revisions

There do still appear to be a few grammatical/typo issues (i.e. (...), words with no space between them and double full-stops at the end of sentences). It is suggested that the authors carefully read through the re-submitted work and correct these errors before the manuscript is processed for publication.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
